

1st PoreLab Junior Forum

March 8th 2018, 13:00 - 19:00

Room V414
Physics department
University of Oslo

Contact info:
Marcel Moura (95453499)
Fredrik Eriksen (45467194)

PROGRAM*

13:15 – Marcel – Intro and posters placement

13:30 – Signe – PoreLab Junior Forum – WHY?

13:45 – Marcel – Slack and such

14:00 – Guillaume

14:15 – Fredrik

14:30 – Le

14:45 – Kristian

15:00 – Marcel

15:15 – 15:45 Poster Break 1 with Pizza

15:45 – Mathias

16:00 – Morten

16:15 – Olav

16:30 – Marco

16:45 – Magnus

17:00 – 17:30 Poster Break 2 with Pizza leftovers =P

17:30 – Srutarshi**

17:45 – Haili**

18:00 – Seunghan

18:15 – Jonas

18:30 – Eivind

18:45 – Marcel – info about food and such

19:00 – Food and such (Den Gamle Major)

*In order to give some extra flexibility for the organizers, the presenters don't get to know the time of their presentations. 15 min is good but feel free to choose any duration in the window 10min<presentation<20min.

**Talk postponed to the next PoreLab Junior Forum, due to short time.

Transport info

➤ From airport to Oslo

You can take the regular NSB train which is the cheapest option. Stations Oslo S (Jernbanetorget) and Nationaltheatret are both located downtown. Alternatively you can also take the express train flytoget.

➤ To the University:

You can take the metro (T-bane) to Blindern station. We will have lunch at 12:15 at Frederikke, on the 1st floor, second hall. Their problematic address is Problemveien 11. It's located right in the middle of the campus. If you arrive earlier than that you can come to the Physics department, address Sem Sælands vei 24, room V416.

Food info

Lunch and dinner will be covered by PoreLab. For the lunch, you just have to prepare your plate on the buffet at Frederikke, get something to drink or some water, go to the cashier to register the food and say that you are part of the PoreLab meeting. We will seat on a big table, most likely on the second hall, right after the cashiers.

We will have dinner at 19:00 at Den Gamle Major, Bogstadveien 66, very close to Majorstuen metro station. We will go together after the meeting, but if you want to go by yourself you can go directly. There will be a big table at the back reserved for us. You can choose your main course, options are the 4 burgers, Fish&Chips or Bangers&Mash. Their menu can be found here:
<https://gamlemajor.no/mat/>

You don't have to choose in advance, we can do it directly there. A moderate amount of drinks (say 2) is also included, but you can have more paying by yourself at the bar.

Please bring a small amount of cash to be given as tip at the restaurant (I think around 30kr per person should be fine).

Lab visits

Those of you who want to go for the lab tour, please come to the Physics department room V416 on Friday, March 9th at 10:00. Our labs are on the basement of the same building (Kjeller).

Posters

Please bring old posters. Anything that you think could represent the kind of work you do is good. It doesn't need to be related to your current project.

Introduction slide

It would be nice if you could include an opening introduction slide about yourself on your presentation. You can feel free to put whatever you want, here follows my suggestion:

My job in PoreLab: Postdoc

Name: Marcel Moura

Background: BSc (Physics - UFPE Brazil), MSc (Physics / Fluid Mechanics / Vortex Dynamics (theory) - UFPE Brazil), PhD (Physics / Fluid Mechanics / Flow in porous media (experimental) - UiO Norway)

Extra relevant info (optional): I have a role in the student sections of InterPore and InterPore Norway
