

Dear PoreLab Junior Forum participants,

Here is a more detailed program of the Junior Forum activities on November 10th:

- ~10:00-12:00: Coffee and greetings at Porelab Oslo. The doors here remain unlocked until 16:00, and we are located on the third floor of this building: <https://maps.app.goo.gl/8PYXcLzRHS3tbKNc9>
- 12:00: A lunch will be served - probably in the same conference room as the presentations will take place
- 13:00: Presentations of our projects. Since we do not have many participants, we are not pressed for time. So no need to stress too much about having exactly 1' or 10' presentations :)
- ~15:00: Discussion about how we can improve participation in PoreLab activities (e.g., Lecture Series, etc) and mingling activities
- ~ 15:30 OPTIONS:
 - @15:30: There will be a Njord Seminar (via Zoom) with John Wettlaufer (<https://physics.yale.edu/people/john-wettlaufer>), with the Title: "Films shape the world". John Wettlaufer is a very prolific Yale professor in condensed matter physics, and, among other things, is currently a member of the Nobel Committee for Physics. That could be a nice opportunity for us to see an inspiring "high level" talk.
 - About the same time: A visit to the laboratories where PoreLab experiments are performed.
- 18:30: I booked a Table at Taverna'n (<https://tavernan.no/>) for dinner
- After dinner: we can move to Tilt (<https://tiltoslo.no/>), a bar near the restaurant.

Ideally, you could send me the slides by Wednesday night (as I will be out of the office on Thursday for Interpore). But if that's impossible, we can try to do the presentations from your laptops on the day.
